PROFESSIONAL SUMMARY

Data Analyst with 2+ years of experience collecting, analyzing, and visualizing data across faith-based and technology environments. Skilled in dashboard development, data quality management, automated reporting, and business intelligence solutions. Proficient in SQL, Python, Power BI, Tableau, Excel, and Google Sheets, with a strong focus on transforming complex datasets into actionable insights that support data-driven decision-making.

CORE SKILLS

- **Data Extraction & Integration:** SQL, APIs, Google Sheets, Excel
- **Data Cleaning & Transformation:** Python (Pandas), ETL pipelines, data validation
- **Reporting & Visualization:** Tableau, Power BI, Excel dashboards
- **Data Analysis & Business Intelligence:** KPI Monitoring & Reporting, Customer Behavior Analysis, Segmentation Analysis, Trend Analysis, Business Intelligence
- **Dashboard Development & Automation:** Dashboard Development, Process Automation, Reporting Automation
- **Data Modeling:** Relational datasets, data structuring, query optimization
- **Collaboration:** Cross-functional teamwork, stakeholder communication

PROFESSIONAL EXPERIENCE

Church of the Assumption | Abuja, NG

Data Analyst | Dec 2024 – Present

- Manage and maintain parish databases containing membership records, sacramental data, attendance records, and ministry participation information.
- Collect, clean, validate, and integrate data from multiple registry to ensure reporting accuracy, consistency, and data quality.
- Developed the parish's first operational dashboard to monitor attendance trends, membership growth, contribution patterns, and engagement metrics.
- Built automated reporting processes and produced monthly analytics reports, improving accessibility of key performance metrics for parish leadership.
- Performed attendance, engagement, and participation analysis, providing actionable insights that supported pastoral planning and data-driven decision-making.

DataVerse Africa | Remote, NG

Data Analyst Intern | Jul 2025 – Sep 2025

- Extracted, cleaned, and analyzed large datasets across multiple domains, ensuring data quality and usability
- Developed analytical reports to uncover trends and insights for decision-making across projects
- Worked with structured datasets to identify inefficiencies and improve data accessibility
- Collaborated with cross-functional teams to support data-driven initiatives

HAMOYE AI | Remote, NG

Data Visualization/Storytelling Intern | Mar 2024 – Jul 2024

- *Cleaned and transformed datasets to generate actionable insights for business and policy use cases*
- Applied data preprocessing techniques to improve dataset reliability and consistency
- Ranked in the top 1% for delivering high-impact, insight-driven analysis

FEATURED PROJECTS

SaaS Revenue Reconciliation & Data Quality System

[Project Link](#)

- Designed a SQL-based system to reconcile user access data with billing records across datasets
 - Identified revenue leakage and data inconsistencies, improving financial data integrity
 - Structured datasets for efficient querying and analysis, supporting downstream reporting
-

Python Data Pipeline & Automated Reporting System

[Project Link](#)

- Built an automated ETL pipeline to extract, clean, and standardize raw data from multiple sources, including APIs and spreadsheets
 - Integrated cleaned datasets into Google Sheets for real-time reporting and stakeholder access
 - Reduced manual reporting effort and improved data accuracy by implementing validation checks
 - Enabled consistent, repeatable reporting workflows for business monitoring
-

End-to-End Customer Churn Analysis & Marketing Insights

[Project Link](#)

- Cleaned and analyzed customer datasets to identify behavioral patterns across segments (contracts, payment methods, usage)
- Developed predictive model to identify high-risk users, enabling targeted retention campaigns
- Delivered interactive dashboards in Tableau to track key metrics and support marketing decision-making
- Translated analysis into actionable insights for improving customer retention strategies

EDUCATION

Master of Business Administration

National Open University of Nigeria (NOUN)

TECHNICAL TOOLS

- Languages: Python, SQL
- Visualization: Tableau, Power BI, Excel
- Technologies: Google Sheets API, Jupyter Notebook, Microsoft 365
- Processes: ETL Pipelines, Data Cleaning, Data Validation

CERTIFICATIONS

A/B Testing for Business Analysts: Udacity, (In view)

Data Curation for Storytelling: HamoyeAI, July 2024

Mastering DAX Foundation: Foresight BI, August 2024

SQL Analysts: Udacity, 2023
